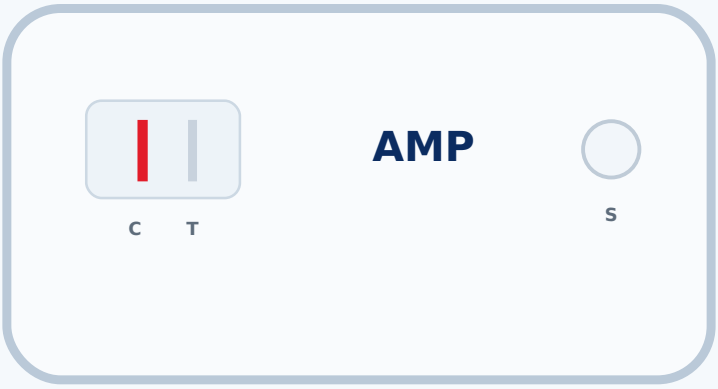
NIP-RT-DOA-001

Amphetamine Urine Rapid Test

Qualitative urine screening at a defined cut-off level



Selected Nipigon cut-off: 1000 ng/mL

SPECIMEN	FORMAT	CUT-OFF	STORAGE
Urine	Cassette	1000 ng/mL	4-30 °C

TEST PRINCIPLE
Competitive immunoassay

SHELF LIFE
24 months

Result time follows the approved IFU/labeling for the selected configuration.

Technical Information

Amphetamine Urine Rapid Test

INTENDED USE

Qualitative detection of Amphetamine and/or its principal metabolite in human urine at the selected cut-off level.

CONFIGURATION

Nipigon commercial configuration shown here: single-item cassette. Final instructions and interpretation must follow the approved product labeling.

Nipigon Catalog No.	**NIP-RT-DOA-001**
Specimen	**Urine**
Format	**Cassette**
Selected Cut-off	**1000 ng/mL**
Storage	**4-30 °C**
Shelf Life	**24 months**
Time to Result	**See approved labeling**
Principle	**Competitive immunoassay**

IMPORTANT

This datasheet summarizes the selected Nipigon configuration. Final cutoff, pack size, instructions, warnings, interpretation and regulatory statements must follow the approved product IFU and labeling for the destination market.
