Dengue IgG/IgM Antibody Rapid Test

Differential Dengue IgG and IgM Antibody Detection

NIP-RT-INF-023

- **Professional rapid diagnostic test datasheet**

PRODUCT OVERVIEW

Rapid immunochromatographic assay for qualitative detection and differentiation of specific IgM and IgG antibodies to dengue virus in human whole blood, serum or plasma.

SPECIMEN	FORMAT	RESULT	STORAGE
Whole Blood / Serum / Plasma	Cassette	15 min	4-30 °C

SHELF LIFE	DETECTION TARGET
24 months	Dengue virus IgG and IgM antibodies

Technical Information

Dengue IgG/IgM Antibody Rapid Test

INTENDED USE

Rapid immunochromatographic assay for qualitative detection and differentiation of specific IgM and IgG antibodies to dengue virus in human whole blood, serum or plasma.

PROFESSIONAL USE

For professional in vitro diagnostic screening. Reactive screening results require follow-up according to the applicable testing algorithm and approved IFU.

Nipigon Catalog No.	**NIP-RT-INF-023**
Specimen	**Whole Blood / Serum / Plasma**
Format	**Cassette**
Time to Result	**15 min**
Storage	**4-30 °C**
Shelf Life	**24 months**
Detection Target	**Dengue virus IgG and IgM antibodies**

PRODUCT NOTE

For professional in vitro diagnostic use. Use the approved market-specific labeling and instructions for use for specimen handling, test procedure, result interpretation and regulatory information.
