Dengue NS1 Ag + IgG/IgM Combo Rapid Test

Combined Dengue Antigen and Antibody Detection

NIP-RT-INF-024

- **Professional rapid diagnostic test datasheet**

PRODUCT OVERVIEW

Rapid test for qualitative detection of dengue NS1 antigen and IgG/IgM antibodies in human whole blood, serum or plasma as an aid in the diagnosis of dengue infection.

SPECIMEN	FORMAT	RESULT	STORAGE
Whole Blood / Serum / Plasma	Cassette	15 min	4-30 °C

SHELF LIFE	DETECTION TARGET
24 months	Dengue NS1 antigen and IgG/IgM antibodies

Technical Information

Dengue NS1 Ag + IgG/IgM Combo Rapid Test

INTENDED USE

Rapid test for qualitative detection of dengue NS1 antigen and IgG/IgM antibodies in human whole blood, serum or plasma as an aid in the diagnosis of dengue infection.

PROFESSIONAL USE

For professional in vitro diagnostic screening. Reactive screening results require follow-up according to the applicable testing algorithm and approved IFU.

Nipigon Catalog No.	**NIP-RT-INF-024**
Specimen	**Whole Blood / Serum / Plasma**
Format	**Cassette**
Time to Result	**15 min**
Storage	**4-30 °C**
Shelf Life	**24 months**
Detection Target	**Dengue NS1 antigen and IgG/IgM antibodies**

PRODUCT NOTE

For professional in vitro diagnostic use. Use the approved market-specific labeling and instructions for use for specimen handling, test procedure, result interpretation and regulatory information.
