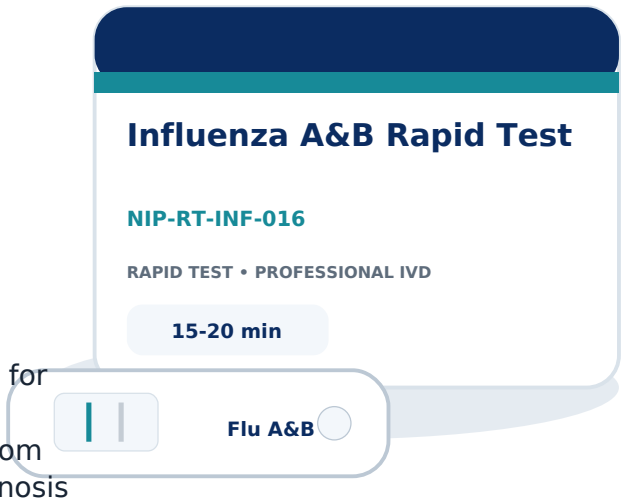
Influenza A&B Rapid Test

Influenza A and B Antigen Detection

NIP-RT-INF-016

Professional rapid diagnostic test datasheet



PRODUCT OVERVIEW

Rapid qualitative immunochromatographic test for detection and differentiation of influenza A and influenza B nucleoprotein antigens extracted from human nasal swab specimens as an aid in diagnosis of influenza infection.

SPECIMEN	FORMAT	RESULT	STORAGE
Nasal Swab	Cassette	15-20 min	4-30 °C

SHELF LIFE	DETECTION TARGET
24 months	Influenza A and B nucleoprotein antigens

Technical Information

Influenza A&B Rapid Test

INTENDED USE

Rapid qualitative immunochromatographic test for detection and differentiation of influenza A and influenza B nucleoprotein antigens extracted from human nasal swab specimens as an aid in diagnosis of influenza infection.

PROFESSIONAL USE

For professional in vitro diagnostic screening. Reactive screening results require follow-up according to the applicable testing algorithm and approved IFU.

Nipigon Catalog No.	**NIP-RT-INF-016**
Specimen	**Nasal Swab**
Format	**Cassette**
Time to Result	**15-20 min**
Storage	**4-30 °C**
Shelf Life	**24 months**
Detection Target	**Influenza A and B nucleoprotein antigens**
Sample Volume	**Extraction procedure; 3-4 drops of extracted specimen**

PRODUCT NOTE

For professional in vitro diagnostic use. Use the approved market-specific labeling and instructions for use for specimen handling, test procedure, result interpretation and regulatory information.
