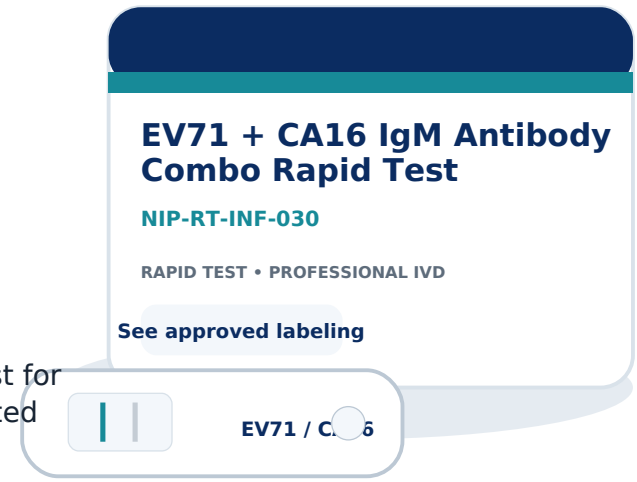
EV71 + CA16 IgM Antibody Combo Rapid Test

Combined EV71 and Coxsackievirus A16 IgM Detection

NIP-RT-INF-030

Professional rapid diagnostic test datasheet



PRODUCT OVERVIEW

Rapid qualitative immunochromatographic test for combined detection of IgM antibodies associated with Enterovirus 71 and Coxsackievirus A16 in human whole blood, serum or plasma for professional in vitro diagnostic use.

Technical Information

EV71 + CA16 IgM Antibody Combo Rapid Test

INTENDED USE

Rapid qualitative immunochromatographic test for combined detection of IgM antibodies associated with Enterovirus 71 and Coxsackievirus A16 in human whole blood, serum or plasma for professional in vitro diagnostic use.

PROFESSIONAL USE

For professional in vitro diagnostic screening. Reactive screening results require follow-up according to the applicable testing algorithm and approved IFU.

Nipigon Catalog No.	**NIP-RT-INF-030**
Specimen	**Whole Blood / Serum / Plasma**
Format	**Cassette**
Time to Result	**See approved labeling**
Storage	**See approved labeling**
Shelf Life	**See approved labeling**
Detection Target	**EV71 and CA16 IgM antibodies**

PRODUCT NOTE

For professional in vitro diagnostic use. Use the approved market-specific labeling and instructions for use for specimen handling, test procedure, result interpretation and regulatory information.
